Toll-Free: 1-866-713-TICK
TickCheck LLC - Tick Testing Order Form

TickCheck uses PCR-based DNA testing to determine whether a tick carries the bacteria that cause Lyme disease and over a dozen additional tick-borne diseases (such as Anaplasma, Babesia, Bartonella, Ehrlichia, Tularemia, *Borrelia miyamotoi*, STARI, and Rickettsia). By testing the tick that bit you, you can determine your risk of exposure to these diseases.

Mail This Form, Payment, and Specimen To:

TickCheck Tick Testing

562 Independence Road
East Stroudsburg, PA 18301
ATTN: LABORATORY SPECIMEN

Who Referred You: _____

What Can We Test?

We test any species of tick including Deer ticks, Dog ticks, and Lone star ticks. We can test ticks of any life stage, alive or dead. After removing the tick, place it in a sealed bag and mail it with this form to our laboratory. We can test multiple ticks removed from the same host at the same time.

Choose One Testing Panel:

<input type="checkbox"/>	Basic Panel	Test for the top three pathogens most relevant to your tick species.	\$49.99
<input type="checkbox"/>	Advanced Panel	Test for the top six pathogens most relevant to your tick species.	\$99.99
